

MYPAN TRIAL

The MYPAN Trial: An Open Label Randomised Controlled Trial of Mycophenolate Mofetil Versus Cyclophosphamide for the Induction of Remission of Childhood Polyarteritis Nodosa

Regulatory Approvals in Place

We are pleased to confirm that the trial has received full regulatory approvals in the UK from the MHRA and research ethics committee. Both approvals were given on the 25/09/2014, this means that we have all regulatory approvals to begin the trial in the UK pending individual trust approvals.

UK local site approvals

Applications for local site approvals in the UK has started in Alder Hey, Great Ormond Street, Newcastle, Norfolk and Norwich, Birmingham, Glasgow, Manchester and Sheffield. We are pleased to state that Great Ormond Street has been given full local site approval. We expect recruitment to begin in January 2015. Applications for Non UK site approvals will begin early 2015.

PVAS and PVDI training

Each participating trial site must have one investigator trained in PVAS and PVDI assessment before the site can open. We have held training sessions in November 2014 and December 2014 and so far 58% of sites have had training. We plan to hold further sessions in January and February 2015, any investigators who have not received training should make every effort to attend one of these training sessions.

Merry Christmas and Happy New Year to all

We wanted to wish everyone a very happy Christmas and best wishes for the new year, we look forward to starting recruitment in 2015.
